

Accreditation Statement

The 30th Symposium of the Collegium Internationale Allergologicum is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists. The EACCME is an institution of the European Union of Medical Specialists (UEMS), www.uems.net.

The 30th Symposium of the Collegium Internationale Allergologicum is designated for a maximum of **13 hours** of European external CME credits. Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

Through an agreement between the European Union of Medical Specialists and the American Medical Association, physicians may convert EACCME credits to an equivalent number of AMA PRA Category 1 Credits™. Information on the process to convert EACCME credit to AMA credit can be found at www.ama-assn.org/go/internationalcme.

Live educational activities, occurring outside of Canada, recognized by the UEMS-EACCME for ECMEC credits are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of The Royal College of Physicians and Surgeons of Canada.

EACCME credits

Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity. The EACCME credit system is based on 1 ECMEC per hour with a maximum of 3 ECMECs for half a day and 6 ECMECs for a full-day event.

Learning Objectives

1. Updating basic, translational, and clinical science information about the origins, pathology, and clinical consequences of disorders in the fields of allergy, asthma, and clinical immunology.
2. Updating clinical information that will help to advance efforts to improve the prevention, clinical management, and, ultimately, cure of disorders in the fields of allergy, asthma, and clinical immunology.
3. Updating information about differences among the clinical approaches in different nations to improve the prevention, clinical management, and, ultimately, cure of disorders in the fields of allergy, asthma, and clinical immunology, so that it may be possible to agree on best practices for such efforts.
